# Anti-Trust Statement

As participants of this Forum held by NASBI, we all need to be mindful of constraints of anti-trust laws.

This NASBI meeting is conducted for educational purposes; to provide a forum for the open discussion and free exchange of ideas on the designated agenda topics. We are not here to reach any agreement that could have anti-competitive effects. It is the duty of everyone to avoid a discussion of illegal subjects, even if someone else inadvertently pursues a prohibited course of action or discussion. Secret sessions should not be held. Individual issues are the responsibility of the individual company that is confronted with the particular issue. In discussion the pros and cons on a topic of discussion, you may express your opinion, but you should avoid collective agreements on how any particular aspects of products, claims, pricing, etc. should be handled.
